# 1/ WHAT WE OFFER

The services we offer our customers include fabric and printing research, measurement chart preparation for fit samples, initial proto sample development, SMS collection preparation, and managing all stages up to shipment. Our standout capabilities are innovative product presentations and R&D, rapid response and problem-solving, on-time delivery and rigorous quality management.

## END-TO-END PRODUCTION SERVICES

# 2 / TECHNOLOGY

We have implemented fully automated processes for Product Lifecycle Management (PLM), Enterprise Resource Planning (ERP), Customer Relationship Management (CRM) and 3D modeling adaptation. These technologies help us manage all stages from collection development to product delivery, minimize errors and significantly reduce the time required for collection sample preparation.

Cutting, sewing, sample sewing, quality control, ironing and packaging processes are carried out within our company. Cutting is performed flawlessly with the BULLMER PROCUT D80015 automatic cutting machine.

A black metal clothing rack is shown, filled with various items. On the top bar, there are several white papers or documents hanging from hangers. Below them, a variety of clothing items are hanging, including a blue long-sleeved shirt, a white hoodie with black lettering on the sleeve, and several other garments in different colors and patterns. A white rectangular text box is overlaid in the center of the image.
